

About Atlas Dynamics:

Atlas Dynamics, founded in 2015 by Ivan Tolchinsky, is a next generation aerospace company providing autonomous and inter-connected UAV systems. Utilizing its proprietary aerospace technology, the company provides users with valuable data, quickly and safely, through highly resistant, intuitive and easy-to-use products. Atlas serves a range of visual-line-of-sight (VLOS) and behind-visual-line-of-sight (BVLOS) applications. Atlas drones can achieve longer flight times, wider ranges, faster speeds and greater altitudes with versatile sensors and payloads to serve key markets including infrastructure inspection, construction, security, first response, delivery and insurance.
